# Unique Features

## Stant Fuel Caps

These safety features are found ONLY with Stant fuel caps

### OE Pressure Relief

- Prevents fuel vapors from exiting the fuel system under normal operating conditions
- Allows an escape path for pressure in an impact situation where the fuel tank has collapsed
- Permits pressure to escape in the event of a Vapor Management System malfunction such as a plugged vent line.

### OE Vacuum Relief

- Prevents fuel vapors from exiting the fuel system via the fill tube under normal operating conditions
- Allows an alternative path for air to flow into the fuel tank in the event that there is an obstruction in the Vapor Recovery and/or Vapor Management Systems
- Permits fuel system to normalize during natural vacuum situations. For example, a hot fuel tank being cooled down by a drive through car wash.

# Unique Features
