

OIL STABILIZER

HIGH MILEAGE TREATMENT  
**ENGINE SUPPLEMENT**

Rislone® Hy-per Lube® Engine Oil Supplement is a 100% premium base oil and petroleum-extracted high mileage treatment additive blend that works with all motor oils including conventional, high mileage and synthetic formulas to make older, high-mileage and high-performance engines run better and last longer. Also great to use in gears boxes, differentials and axles. Works with all lubricants including petroleum & synthetic engine oil, ATF and gear oil.

Use in Gasoline & Diesel Cars, Trucks, SUV's, RV's, Semis & Tractors for Automotive, Industrial, Construction, Heavy Duty and Racing.

Heavy duty protection for all driving demands. Supercharges oil performance.

Turns petroleum and synthetic oils into a hyper-performance lubricant.

- **Extends Engine Life**
- **Eliminates Dry Starts**
- **Prevents Thermal Breakdown**
- **Reduces Friction & Wear**
- **Quiets Noise**
- **Increases Oil Film Strength**

**DIRECTIONS:**

For best high mileage and older engine protection, add to your favorite brand of oil anytime, at or between oil changes.

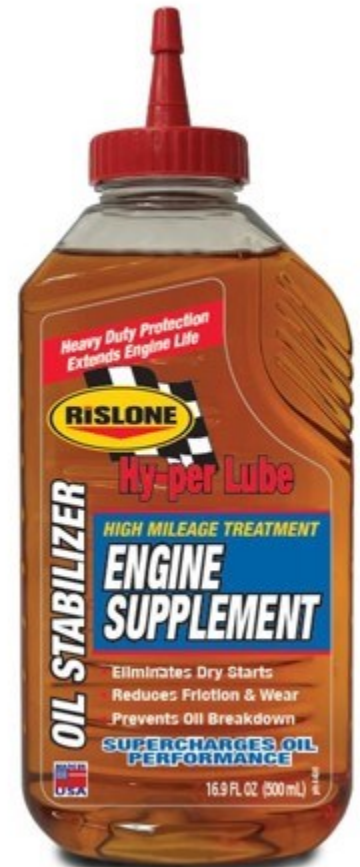

**Gasoline / Diesel Engines:** (Cars & Light Trucks)

Add entire bottle to engine crankcase.

**Other Applications:** 4-stroke marine & motorcycle, ATV (including-wet clutch), small engines (lawn mower type), agricultural, industrial, differentials, gear boxes and racing engines— Add 3 ounces for every quart of capacity.

**Note**—One bottle treats 4 to 8 quarts of oil. For severely worn components, double dosage.

**Assembly Lube**— 100% Engine Oil Supplement

**100% SATISFACTION GUARANTEE:**

If you are not completely satisfied with the performance of our product, we will refund the purchase price. Visit [www.rislone.com/refunds](http://www.rislone.com/refunds) for details.

***Don't Just Stabilize Your Oil...  
Improve It 5 Ways with Rislone Hy-per Lube***

**1. Increases Film Strength:**

Over 75% of internal wear occurs during the first few seconds of engine startup. Rislone Hy-per Lube Engine Oil Supplement leaves a protective film that will not run off on all internal parts including cylinders and gears, providing complete protection against start-up wear.

**2. Lowers Temperature:**

All lubricants can foam. Foaming restricts the oil's ability to dissipate heat which increases operating temperature leading to premature wear. Rislone Hy-per Lube's anti-foam capability reduces foam, helps extend engine life, and lowers operating temperature.

**3. Prevents Thermal Breakdown:**

High performance additives ensure against viscosity and thermal breakdown. Rislone Hy-per Lube's 100% petroleum-based formula provides protection between oil changes and can extend oil life by up to 50%.

**4. Reduces Friction:**

Friction modifiers increase engine lubrication in new and old engines. Reduced friction extends engine life, provides more power and can increase fuel economy. This is a benefit for old and higher mileage engines, and will not void any warranty.

**5. Quiets Noise:**

Heavy duty extreme pressure additives greatly enhance oils' ability to cushion and absorb mechanical shock. In older, worn engines Engine Oil Supplement also increases oil pressure to reduce lifter & valve ticking, knocks and other noises.

**Proven Technology. Hy-per Performance.**
